Department of Computer Science & Engineering

Phase I (Project Scope, Planning and Task Definition)

Date: 22/03/2023

Project Title

Ridhim (Music Streaming App)

Project Team

Team Designation	Name	UID	Section
Lead	Puspinder Singh	20BCS7300	610/A
Member1	Sujata Singh	20BCS7295	614/B
Member2	Gurwinder Singh	20BCS7634	610/A

Project Scope

In modern society, people live a fast-paced life, and pressure is constantly present in lives. Due to the wide use of mobile phones, music has become the daily essential spiritual food, everyone's mobile phone inside there must be a music player. An application like rithim is used to balance stress and happiness. It accompanies people anytime, anywhere and anyplace such as when people taking the bus and exercising.

This project is about the rithim application development using Android. The biggest difference between the music player and existing applications is that it is completely free for users to use. It will integrate the advantages of existing music players on the market, as we are developing the features like replay the music as well as shuffle the music. The main feature, which sets our app apart from others is uploading our own music.
